Weekly Coal Production

Production for Week Ended:
August 20, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, stocks, imports, and exports. This week's Supplement 2 contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Wayne Watson under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended August 20, 1988, as estimated by the Energy Information Administration, totaled 20.4 million short tons, slightly higher than production in the previous week. Coal production east of the Mississippi increased by 0.4 million short tons (3.6 percent), while production west of the Mississippi increased by 0.2 million short tons (2.0 percent).

This report contains data on electric utility coal receipts and prices for May 1988 in addition to electric utility coal consumption and stocks for June 1988. Also included are data on U.S. coal and coke exports and imports for June 1988.

Some of the highlights of these data are:

- The 1988 year-to-date (January through May) coal receipts at electric utilities were up 3.0 percent (8.4 million tons) over the 1987 level for the same period.
- Coal stocks at electric utility plants, as of June 30, 1988, were slightly lower (1.3 percent) than the June 30, 1987 level.
- Coal consumption at electric utility plants for January through June 1988 rose 6.1 percent above the comparable 1987 period.
- U.S. coal exports for January through June 1988 were 11.6 percent higher than the 1987 level for the comparable period.
